REPORT ON Clean water and sanitation (SDG 6)

Azerbaijan University recognizes that access to clean water and proper sanitation is crucial for promoting health, well-being, and sustainable development, and it strives to ensure that all students, faculty, and staff have access to these basic necessities on campus

2

The university also implements regular maintenance checks to ensure that water filtration systems are functioning properly, and clean water is consistently available across the campus.

3

Volunteer activities not only enhance green spaces on and around campus but also promote a shared sense of responsibility for protecting nature and combating climate change.

Clean water and sanitation (SDG 6)

Azerbaijan University recognizes that access to clean water and proper sanitation is crucial for promoting health, well-being, and sustainable development, and it strives to ensure that all students, faculty, and staff have access to these basic necessities on campus.

Azerbaijan University's infrastructure is designed to meet high standards for water quality and sanitation. Azerbaijan University is equipped with modern plumbing systems, ensuring that water is safe and readily available for drinking, cooking, and other essential uses. The university also implements regular

maintenance checks to ensure that water filtration systems are functioning properly, and clean water is consistently available across the campus.

Azerbaijan University has also taken proactive steps to promote environmental sustainability. The university educates students and staff on the importance of responsible water use and environmental stewardship through workshops, awareness campaigns, and activities.

Azerbaijan University also engages in various environmental sustainability efforts, such as tree planting campaigns, which help contribute to the preservation and enhancement of the natural environment. These initiatives not only improve the campus's green spaces but also play a significant role in reducing carbon footprints and promoting biodiversity. At Azerbaijan University, both students and staff actively participate in tree planting initiatives as part of the university's commitment to environmental sustainability.

These volunteer activities not only enhance green spaces on and around campus but also promote a shared sense of responsibility for protecting nature and combating climate change.

Azerbaijan University is dedicated to ensuring that all members of its community have access to clean water and proper sanitation, while also contributing to efforts beyond the campus to improve water access in the region. These initiatives, alongside the university's commitment to environmental sustainability, support the broader mission of promoting health, well-being, and a sustainable future.
